## Welcome to the Scansonic collection

**Modern technology**  
Though our design mostly refers to the retro style, the inside of the products are state-of-the art modern technology. The solutions include Digital Broadcast Radio technology, WiFi/LAN internet technology and a variety of docking and bluetooth units.

**Contemporary design**  
We strive to keep design simple and logic. Userfriendliness are focused in all products and developments as well as the overall design, matching the period in which we live.

The retro look is contemporary and serves with the round and classical lines it's own statement in contrast to modern ultra minimalism. Actually the products do quite well in modern as well as classic interior, spreading an atmosphere of relaxing and easy lifestyle.

**A-class service**  
We work very closely with our distributors all over the world to keep up a very high level of service, afterall A-class service is what the consumers expect from a product made by Scansonic.

page 22-23

Check out the technical facts for the Scansonic collection.

## Impressing sound

**R2**  
FM/AM radio

The Scansonic R2 analogue FM radio has easy operation, great sound reproduction, and a solid construction as its core elements. Tune it in manually using the robust, centrally-placed dial, and enjoy. The high-quality FM tuner found in the cabinet features the most modern technologies, ensuring crystal clear reception of your favourite radio stations. On top of the Scansonic R2 is a single, fullrange loudspeaker unit. Although relatively small in physical size, it has been built to deliver a sonic performance that is as memorable as the music itself.

Additional connections include auxiliary line-in (for external devices), and a stereo line-out, which can be used for headphones or external loudspeakers.

Quite literally at the centre of the R2's solid cabinet is the

loudspeaker unit. Built with natural sound reproduction in mind, it fills the room with sound with ease.

The 3.5" up-firing loudspeaker provides a full range of sonic reproduction. The sound image is warm and rich, never

stinging and shrill. Because unless you're a teenager who absolutely has to play music at the highest volume possible, you'll appreciate the R2's ability to play thoroughly, even at low volumes.

The solid MDF-cabinet features an open, bass-reflex construction. By adding the bass port, we're able to extend the frequency range lower than a similar, closed-cabinet construction.

## R3 DAB+/FM radio

One of the most striking technological advancements found in the Scansonic R3 radio is the DAB+ tuner. Built alongside the FM tuner, the DAB+ tuner adds to everything you already love about DAB. Want better sound quality? More stations to choose from? And scrolling texts, more information on the song and the radio station? Then you've found the right solution.

The large, four-line OLED display is your information centre. Enjoy all the info whilst knowing that broadcasts sent in both the DAB III and L bands are still right at your fingertips.

Backwards compatibility ensures it. Engage the alarm function, and be woken by your choice of audio source.

The single loudspeaker unit, located atop the solid cabinet, offers true-to-life sound re-

production. Up-firing, it offers omnidirectional sound, spreading its stunningly accurate tones throughout the room it is located in. Listen closely for rich details from sharp treble accents to rumbling, low bass elements.

Engage the single, robust dial during operation. Just follow along on the display, and use the simple buttons to make your preferred selections. Use the autotune function for DAB+ broadcasts as well as when

making the switch to traditional FM radio reception. Straight forward thinking makes it all even easier.

## R3 BT With Bluetooth

With the Bluetooth addition this fine radio has become even more complete. Larger output via 7 watt amplifier, and an added equalizer function.

This can now play wireless your favorite music stored on any of your digital devices, Smart-phone, computer, tablet etc. Via Bluetooth function

the radio can be turned off, choose program, control equalizer and volume.

*There are tens of thousands of choices*

WIFI AND LAN

## R4 FM/Internet radio

There are tens of thousands of choices out there when it comes to internet radio stations. And they're available at any time, from any place. So come on, and ride the waves created by the world's music. Engage the internet radio function, and the Frontier Silicon module goes to work. An internet connection - be it cabled or wireless - is all you need. It automatically searches in your local area for stations, presenting them to you automatically in a special folder.

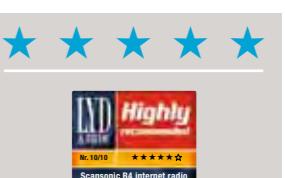

### Striking technological advancements

Turn the operational knob a few times, press it to confirm, and get a load of the sheer variety of stations. You can cross continents or content literally within seconds. Or maybe it's time for a local FM station. Listen in there at the touch of a button, too.

The Scansonic Remote application for smartphone devices is available for download on AppStore and Android Marketplace. With the application you are able to control all the functions on the R4 internet radio from your iPhone or iPod Touch. You can change Mode (Internet, MediaPlayer, FM and

### Remote control APP for iPhone/iPod

AUX), browse through all the stations and podcasts available and select from your presets.

## R 110

Stereo FM/DAB+/  
Internet Receiver  
with App for iOS  
and Android

R 110 has a DAC converter built-in so that it connects to any digital device and via its App it connects easily and your smart device can now control

functions of the radio. The radio is Windows compatible, so streaming via WiFi from a PC is also possible. All these possibilities are delivered

to your loudspeakers via a powerful 2 x 55 watts RMS amplifier unit. Great technique and great performance.

Color: Black  
Finish: High gloss

Color: White  
Finish: High gloss

R 110 is the complete stereo receiver. With FM, DAB+ and Internet it offers an endless number of stations. All this and more packed in a beautiful aluminum cabinet. With this you can listen to your local station or tune into any of 15.000 stations around the world, and at the same time get all information via its clear OLED display.

## A200 Stereo Amplifier

A 200 is a high class stereo amplifier with the latest techniques packed in an elegant, slim, and modern aluminum cabinet. Besides analogue features A 200 has a DAC converter built-in so that it connects to any digital device. Its low distortion and powerful 2 x 100 watts RMS section delivers any programmed material with might and finesse. A 200 is equipped with both optical and coaxial input, as well as output for subwoofer. There is a USB doc for charging or for attaching Bluetooth dongle.

## P2501 Portable FM radio

The P2501 is much more than just old-school styling and our most popular model during the past 4 years. On the inside, it's packed with the newest technologies, including a modern FM tuner, powerful loudspeaker unit, and an intelligent battery and charger unit in one.

When plugged in, the built-in battery is automatically charged, enabling numerous hours of listening pleasure when you take your radio with you to the beach, the workshop, or the garden. Place it where you like, and stay connected all over.

The cabinet itself features a special soft-touch coating, giving it a warm and organic feel. Created by applying a gentle layer of rubber, the coating

invites you to touch it, and provides tactile feedback not found in other portable radios.

## P3000 FM/DAB+ Portable radio

Scansonic P3000 is compact and among the best portable DAB+ radios available at the moment. Excellent crystal clear sound, equalizer and userfriendly handling makes this model a "must have" if you want to enjoy the pleasure of Digital Audio Broadcast (DAB).

The radio is portable and has a beautiful solid rubber coated finish. This makes the P3000 radio resistant to water splash, sand and dust. This is how a true portable radio should be.

You also get AUX input and the necessary cable, making it possible to connect your iPod, smartphone or computer to the radio.

*Small is beautfull*

Color: White

Color: Red

Finish: High gloss

## P4000

Portable DAB+/  
FM radio

Hold the P4000 portable DAB radio in your hand and you will know it's in a league of its own. Elements from classic transistor radios appear prominently, in the design, but the hightech features are obvious with the crystal clear menu display. Yes, the quality is the details and naturally the digital DAB technology inside.

Ever experienced the fantastic world of Digital Broadcast Audio (DAB)? The P4000 DAB+ radio will provide you with a comfortable connection to numerous digital radiostations in the DAB network.

The P4000 is a portable DAB radio, easy to take along where ever you want to go.

Easy to operate using buttons and wheel to scroll through the large four-line OLED display, letting you know all the time what you are doing.

Well it is a radio, does it sound okay? You will be surprised

how far the speaker development has come, together with modern technology in DAB, equalizer and amplifier units, the P4000 plays with crystal clear and powerfull sound.

Even if the radio is stuffed with technology, the functionality and handling is quite simple, just as it has to be.

## SKY

Portable DAB+/FM radio

Remember the 60's - when a mans best friend was his Cadillac, his jeans and his freedom. The Scansonic SKY design takes you a trip down memory lane inspired by the lines and materials from then. Now a days, we do things very differently - cars are smaller, safer and more environmentally friendly, jeans are still a mans best friend but the sound coming from portables is very much influenced by the technological development.

Scansonic SKY comes in two models: Portable FM and Portable DAB+/FM. Digital Audio Broadcast is growing around the world, and the benefits of digital radio are enjoyed by more and more people - this is freedom. Just surf around and you will find specialized programmes with just the kind of entertainment you like.

## S4 Shelf speaker

In most people's search for great loudspeakers, they're faced with a dilemma: great looks or great sound. And unfortunately for many of them, they're forced to make this decision because so many speakers on the market don't encompass both characteristics. But that's where we step in.

When space is limited, but your desire for great sound isn't, a pair of S4 speakers fits the bill. Our physically smallest unit, each one features a single 1" tweeter and 4" woofer in the

modest cabinet. Engage them, and all thoughts of smallness are erased by their rich performance.

Color: Black  
Finish: High gloss

Color: White

## S5 Shelf speaker

The S5 shelf speaker combine attractive styling with appealing sound. The S5 shelf speaker is amazing in what you get from this "small" speaker. Excellent sound and a nicely designed appearance, easy to melt into any living room, adding style and sound to the decoration.

Being different is easy when you're not ashamed of being good. That's why the S5 speaker stands out. Literally.

The unique wall brackets for this powerful 5" speaker tip it downwards at an appealing 15° angle, directing its sound

towards the listening position. It's great in a surround sound setup as well as during everyday listening.

# S3 BT

Active with Bluetooth

The S3 Active speaker is a new development using our experiences from the S-series and the S5 Active speaker. The S3 is a very small loudspeaker but make no mistake, the sound from this little and beautiful speaker will surprise you, and give you much better sound than you will expect.

The S3 Active wireless speaker is a new development featuring a built-in 2x20W stereo amplifier in the speaker cabinet. It makes the most out of the short distance between amp and driver unit to ensure a sound reproduction that is as close

to the original recording as possible. In addition we have put in an optical connection, making the speaker match the requirements of today. Via Bluetooth it has easy pairing to and streaming from your smartphone, tablet or computer.

# S5 BT

Active with Bluetooth

The S5 Active speaker will give you much more opportunities with regards to connectivity than a simple loudspeaker. Via Bluetooth it has easy pairing to and streaming from your smartphone, tablet or computer.

A variant of the S4/S5 family, the S5 Active features a built-in 2x50W stereo amplifier in the speaker cabinet. It makes the most out of the short distance

between amp and driver unit to ensure a sound reproduction that is as close to the original recording as possible.

## S6

Center speaker

Born to be at the centre of things, the S6 loudspeaker is a great complement to our popular S4 and S5 loudspeakers. It shares the same design language, creating a visual as well as sonic harmony when used with them.

The two-way sealed box system, featuring twin 4" woofers and a single 1" dome tweeter, has been specially designed for centre channel reproduction in multichannel surround sound solutions.

The accompanying wall bracket allows you to mount your S6 just below your TV, elevating it from the floor or stand below.

This flexible placement option brings the centre channel, which primarily consists of dialogue, closer to the screen, enhancing the total home cinema experience.

SCANSONIC SURROUND 5.1  
S9, S4, S6 & SUB12

## S8

Active subwoofer

Since the first loudspeakers were invented over 100 years ago, audiophiles have been driven to get more and better performance out of them. Specialized components and entire speakers have added dimensions to the listening experience that the early sonic pioneers could probably not even dream of.

The subwoofer is a great example. Producing exclusively low frequency effects - also known as LFE's or just bass - it expands the sound picture normally heard by stereo speakers. And the Scansonic S8 is no exception.

Color: Black	Finish: High gloss
--------------	--------------------

This front-firing 8" active subwoofer pumps out LFE's at a level you would expect from a larger sub. The long throw voice coil is coupled with a built-in 80W (RMS) amplifier, improving performance and lessening loss and distortion.

Color: White	Finish: High gloss
--------------	--------------------

Color: Red	Finish: High gloss
------------	--------------------

## S9

Floor speaker

Take a closer look, then a closer listen. Yes, what you're seeing and hearing is indeed true. It's a pair of Scansonic S9 speakers, and they're delivering on all counts. Long and lean, the S9 speakers stand tall in your home, adding visual colour and aural enjoyment. At 93 cm tall, they automatically create expectations of smooth, powerful soundscapes. Connect them quickly and easily to your preferred audio system, and let the technology take over.

Inside the narrow and deep cabinet, a unique construction awaits. Consisting of a tweeter and midbass d'Appolito driver unit combination at the top, and a subwoofer below, the S9 construction gives a more

harmonious and even sound picture for the user.

Placing the midbass units on each side of the tweeter combines the sonic output so it seems to emanate from one single unit rather than three.

What's more, the construction makes it possible to direct the sound towards your listening position. The sweet spot has rarely sounded or looked so good!

Color: Black	Finish: High gloss
--------------	--------------------

Color: White	Finish: High gloss
--------------	--------------------

Color: Red	Finish: High gloss
------------	--------------------

## S12

Active subwoofer

Can subwoofers get too big? Can people (ever) have excessive bass? Or do they need more? Fans of the Scansonic S12 active subwoofer certainly answer positively to the last question. Their hunger for additional low-frequency effects (LFE's, for short) compelled us to expand our product portfolio and create it just for them.

A single 12" driver unit is powered by an impressive 120W (RMS) built-in amplifier. And like other Scansonic subwoofers, it features a long-throw voice coil, providing a crisp linear movement that ensures big, controlled and deep bass that fills the room.

Because all rooms are different, individual performance parameters on the S12 including volume, frequency, and phase can be adjusted independently. This allows you to fine-tune your sub for an optimal sound experience, regardless of placement or room construction.

## M7 Wireless speaker

Connect to Scansonic M7 wireless speaker with your computer, smartphone or any device holding your favorite playlists, and enjoy the simplicity of a connection that works excellent. Not only does the connectivity make the M7 to a "must-have" but the model offers crystal clear sound from well dimensioned speaker units and a powerfull subwoofer. In addition to all of this you get userfriendly handling from full function remote control. There's nothing to it, just get going.

The cabinet is nicely designed and comes in a flawless high gloss finish in colors black or white.

The wireless technology opens new opportunities for i.e. android smartphones, who all have the simple and functional wireless technology.

When the device is once paired to the M7, the device will be in M7 memory and the party can continue. Nice and simple.

Power supply:	100-240V AC	100-240V AC	100-240 volt	100-240V AC	230 volt	230 volt	220-240V AC/DC	220-240V AC/DC	230 volt	230 volt	220-240V AC / built-in rechargeable battery	220-240V AC or Battery	230 volt or DC	220-240V AC or Battery	220-240V AC, batteries or rechargeable batteries	220-240V AC, batteries or rechargeable batteries	220-240V AC or Battery	220-240V AC or Battery
Weight:	1,42 kg	1,43 kg	1,4 kg	1,42 kg	2,20 kg	2,20 kg	1,36 kg	1,34 kg	1,90 kg	1,90 kg	0,96 kg	0,65 kg	0,65 kg	1,0 kg	1,8 kg	1,8 kg	1,3 kg	0,485 kg
Dimensions: (WxHxD)	190x115x148 mm	190x115x148 mm	190x115x148 mm	190x115x148 mm	180x70x240 mm	150x70x227mm	212x130x122 mm	212x130x122 mm	300x120x158 mm	300x120x158 mm	95x195x100 mm	95x160x93 mm	95x160x93 mm	95x195x93 mm	260x180x110 mm	260x180x110 mm	250x193x110 mm	180x125x65 mm

## Technical specifications > Speakers

Model:	S3 BT active speaker with bluetooth	S3 BTL active speaker with bluetooth & learning	S4 Mini speaker	S5 Shelf speaker	S5 BT active speaker with bluetooth	S5 BTL active speaker with bluetooth & learning	S6 Center speaker	S8 Active subwoofer	S9 Floor speaker	S12 Active subwoofer	M6 Active docking speaker	M7 Wireless active speaker	D2 Active dockingstation
Amplifier:	2x20 watt RMS	2x20 watt RMS			2x50 watt RMS	2x50 watt RMS		80 watt rms		120 watt rms	2x7 watt rms + 24 watt rms subwoofer	2x7 watt rms + 24 watt rms subwoofer	2x8 watt rms
Tweeter:	1"	1"	1"	1"	1"	1"	1"		1"		2x1"	2x1"	
Midrange:								4"		2x3" full range	2x3" full range		
Woofer:	3"	3"	4"	5"	5"	5"	2x4"	8"	2x4"	12"	1x4"	1x4"	
Power:		100 watt	120 watt				150 watt		200 watt				
Impedance:	8 ohm	8 ohm	8 Ohm (min. 4 Ohm)	8 Ohm (min. 4 Ohm)	8 ohm	8 ohm	8 Ohm (min. 4 Ohm)	8 Ohm (min. 4 Ohm)	8 Ohm (min. 4 Ohm)	8 Ohm (min. 4 Ohm)			
Sensitivity	86 dB	86 dB	86 dB	88 dB	88 dB	88 dB	89 dB	190 mV	89 dB	300 mV			
Frequency range:	60-20.000 Hz	60-20.000 Hz	60-20.000 Hz	50-20.000 Hz	50-20.000 Hz	50-20.000 Hz	50-20.000 Hz	30-160 Hz (Adjustable)	45-20.000 Hz	40-200 Hz (Adjustable)	35-20.000 Hz	35-20.000 Hz	60-20.000 Hz
Volume control	•	•			•	•		•		•	•	•	•
Phase:								0-180 (Adjustable)		0-180 (Adjustable)			
Crossover:	•	•			•	•		Electronic		Electronic			
Terminal:	Wire or banana plug	Wire or banana plug	Binding pots (Wire or 4mm banana plug)	Binding pots (Wire or 4mm banana plug)	Wire or banana plug	Wire or banana plug	Binding pots (Wire or 4mm banana plug)		Binding pots (Wire or 4mm banana plug)				
Sound system:	2-way bassreflex	2-way bassreflex	2-way sealed box	2-way sealed box	2-way bassreflex	2-way bassreflex	2-way sealed box	1-way vented box	3-way bassreflex	1-way vented box	3-way bassreflex	3-way bassreflex	
Remote controle included:	•	•			•	•				•	•	•	•
Input: (for iPod, iPhone etc.)	Optical, Line-in (RCA)	Optical, Line-in (RCA)			Optical, Coaxial, Line-in (RCA)	Optical, Coaxial, Line-in (RCA)				•	•		
Headphones/line-out:													
Subwoofer output:	•				•	•		•		•			
Subwoofer input								Input / Output		Input / Output			
Color options:	Black or white high gloss	Black or white high gloss	Black, white, red or silver high gloss	Black, white or red high gloss	Black, white or red high gloss	Black or white high gloss	Black, white or red high gloss	Black, white or red	Black, white or red high gloss	Black, white or red high gloss	Black or white high gloss	Black or white high gloss	Black or white
Charger: (for iPod, iPhone etc.)					5 V USB charger	5 V USB charger					5V DC USB charger	•	
Power supply:	230 volt	230 volt			230 volt	230 volt		220-240V AC		220-240V AC	220-240V AC	220-240V AC	220-240V AC
Weight:	1,93 kg	1,93 kg	2,2 kg	3,4 kg	5,3 kg	5,3 kg	4,3 kg	12,9 kg	16,2 kg	24,6 kg	4,1 kg	4,1 kg	0,135 kg
Accessories included:	Brackets	Brackets	2 wall brackets (0°-15°)	2 wall brackets (0°-15°)	Brackets optional	Brackets optional	1 wall brackets						
Dimensions: (WxHxD)	115x180x140 mm	115x180x140 mm	132x194x161 mm	151x223x210 mm	151x223x210 mm	151x223x210 mm	340x132x199 mm	270x305x270 mm	132x933x368 mm	370x435x370 mm	385x125x245 mm	385x125x245 mm	Ø110x35 mm
